Exercise B

1 I read that 'Titanic' was great but when I saw it I felt it was **overrated** by the film reviews. I sat there watching a lot of special effects without feeling interested and found it all **tedious**.

2 Although the special effects are basic, the threat of the shark in 'Jaws' is really **convincing**. As you hear the music and it approaches its next victim, the tension is also absolutely **gripping**.

3 'Cinema Paradiso' is a **compelling** film as you want to know more and more about the main character's early life. Its love story is also deeply **moving**.

4 The scenery in James Bond films is often **stunning** – set against mountains, views from the tops of skyscrapers or even locations on islands of paradise.

5 'Toni Erdman' is a comedy which is sometimes **hilarious** as it will make you laugh. However, it is also a **thought-provoking** comment on how parents' relationships with their adult children can change.
